

# COMPUTER RECYCLE

Sharing Connections • 5111 Chase Avenue · Downers Grove, IL 60515 · (630) 971-0565  
www.sharingconnections.org

When you  
recycle your  
computer—  
you're  
making a  
donation to  
Sharing  
Connections.

## The program includes:

- All travel related charges
- All Freight and handling
- All Labor associated with the pickup
- End of life recycling of all items that can't be donated to a local school. This means that your items will be recycled for their raw materials and will NOT be deposited into landfills.
- Protection of your Data. All hard drives are shredded to protect your identity and then recycled for their raw materials.
- Documentation is provided within 72 hours of your pickup verifying that these items have left your possession and will be recycled for their raw materials and/or donated to a local school.

## How does it work?

EOS delivers a special recycling carton to your business or home. The carton is large enough to fit a 17 inch monitor, Ink jet printer, PC, Keyboard, and Mouse. You simply load these items into the recycling carton and call us for the pickup at 630-499-0700. The recycling carton is \$59.00 including taxes and all other related charges. Each additional carton is \$25.00. You can deposit other Non-biodegradable items into the carton such as Laptop, Televisions, Radio's, Stereo equipment, Phone and related equipment.

## Why do this?

- Most of these computer and electronic items will never biodegrade in a landfill.
  - Most CRT/Monitors have "Lead" in the glass which is actually considered "Hazardous" waste. Can you imagine what that could possibly do to our soil?
  - We are slowly, but surely running out of landfill space. Where will we deposit our trash in the future with no more landfill space? These items can very easily be reused.
  - Reduction in raw material costs. The more we recycle the less we will need to use Fossil fuels to manufacture such items as plastics and metal products. This will result in a reduction in the material cost of these items. The end result will be an overall reduction in the cost of finished goods to the consumer.
- \*This is a small fee to ask to insure that these items find themselves in the right place. We guarantee with our certificate that these items will be recycled within all the guidelines and regulations of all the state and federal agencies.
